

SNOWBULANCE

**New
Product**

When success is measured in minutes, depend on the proven field performance of our all-weather rescue units

This unique rescue unit is fully enclosed and has enough room for the patient and one or two attendants.

A superior gas shock suspension and cushioned limited rotational hitch provides greater patient comfort. The Snowbulance has an optional heater that will help keep the patient warmer and safe. If you need to make a nighttime rescue, the Snowbulance has an optional interior light to assist you. The Snowbulance is made of polyethylene and is equipped with body reflectors and brake/running lights.

AVAILABLE OPTIONS:

- Colors available: Black, or Marine Blue
- Ferno aluminum stretcher (shown below)
- 16" and 18" polyethylene back boards
- Plastic ski skins
- Composite skis
- Interior Heater
- Interior Light
- Attendant's Seating
- ATV conversion kit (coming soon)
